

Small space, big relaxation: ModularSpa by wedi is a shower and steam bath in one

Emsdetten, 26 March 2025. An individually designed feel-good place in your own bathroom? This is possible with the ready-to-install ModularSpa solutions from wedi. They are the basis for modular steam showers – and fit even in the smallest of spaces.

A modern bathroom today is more than just a room with certain functions. It has become a habitat – and the demands continue to rise. Health, recreation and comfort are the focus of attention. The bath should become more and more a place of well-being, where you can relax and recharge your batteries.

Sophisticated systems as an opportunity

Large opportunities for additional orders are offered to processors by this trend – if they rely on the right systems. Example ModularSpa from wedi: The sophisticated concept for steam showers combines a shower and a steam bath and can be adapted to any concrete structural situation. ModularSpa will fit anywhere you already have a shower. A separate (basement) room, such as a sauna, is not necessary.

"ModularSpa opens up large open spaces to realize your own ideas of a modern bathroom," says Daniel Meiners, Head of Sales for Individual Systems Europe at wedi: "The modular design also allows for fast installation without limiting customer requirements."

The system is available in three basic types. Width is selectable between 1200 mm for Small Baths and 2300 mm for Large Rooms – continuously variable. In addition to the appropriate size, various benches, roof surfaces in RAL tones or lighting elements can also be selected.

Reliability through prefabrication

ModularSpa can be installed quickly and easily in renovation and new construction projects: Wedi delivers the steam bath modules finished with flush-mounted fittings, hot and cold water pipes. This 'plug-and-play' principle eliminates the need for expensive pipe laying or complicated connections in the wall. Thanks to the modular design, the individual elements are quickly assembled and bonded on site, only the impacts still have to be carried out with a vapor barrier. If the

integrated technology is connected, the steam bath can be covered with the wedi Top Line design surfaces or with tiles.

According to the modular principle

The modular principle is also reflected in the wedi steam bath configurator, which can be found at [https://www.wedi.net/steam bath configurator](https://www.wedi.net/steam-bath-configurator). This enables processors to quickly and easily assemble all components for the steam bath online and advise customers on the basis of these. "The steam bath configurator is thus a practical planning tool and makes the work of the processors enormously easier, also because they can quickly and easily show different variants," emphasizes Daniel Meiners.

About wedi

The wedi Group is a leading manufacturer of innovative system solutions for bathrooms and wet rooms. The company, founded in 1983 in Emsdetten, Westphalia, is known for its building boards with blue XPS core developed by the company founder Helmut Wedi. Today, the system provider employs more than 500 people and is active in over 50 countries. At its two manufacturing plants in Germany and the USA, wedi produces complete building systems and design-oriented components for durable and aesthetic bathrooms. The strategic focus is on a high degree of prefabrication and integrated technology to enable safe and easy installation. wedi is certified according to the environmental protection standard ISO 14001 and pursues a comprehensive sustainability strategy.
