

Detached house

Reference

Renovation and remodelling of a private bathroom

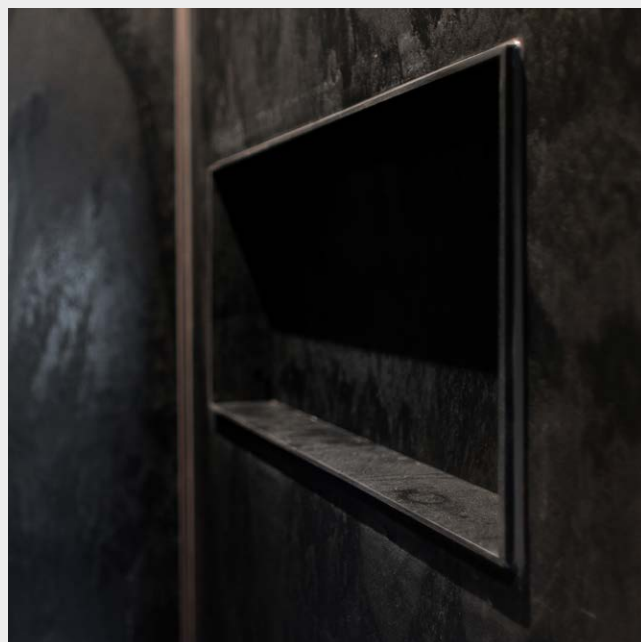

Location

Trøgstad, Norway

Year

2020

Project type
Renovation

Requirements

- waterproof and heat insulating
- fast realisation
- individual constructions

Brief description

The client did the planning of his bathroom himself. In addition to classic tiles in the wall and floor areas, twedi Top Wall ready-to-install design surfaces were used in the shower. The substrate was made of the waterproof and directly tileable wedi building boards and wedi Vapor 85 N building board. For the secure and stable cladding of the WC pre-wall installation, the client opted for wedi I-Board, which was fitted with the matching wedi I-Board Top. He succeeded in creating a special eye-catcher in the ceiling construction. Without further ado, part of the ceiling was also clad with wedi Top Line.
