

Swimming pool

Planning, construction and installation of prefabricated elements on site

Reference

Stadtbad Schöneberg

Customer

Berliner Bäderbetriebe

Location

Berlin, Germany

Year

2010

Type of project
Renovation

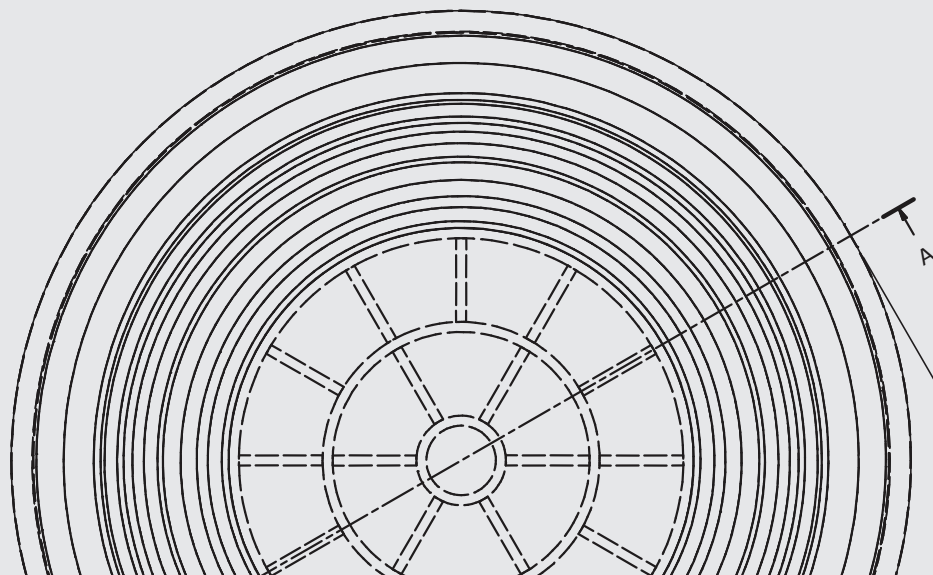

Cladding of the supporting columns with BA 20 - 40mm, exact alignment to the dimensions of the tiles.

Restoration of the stair cases - the risers were equalized using building boards of various thicknesses. Construction of a roof structure over 2 external pools that are to be used more with benches. The benches rest on the actual edge of the pool. The diameter of the benches is 4.30 meters.

Architect K + P beratenede Ingenieure für Bauwesen GmbH

Contractor Berliner Bäderbetriebe

Tradesman Heidrich Fliesen GmbH, Zernitz-Lohm

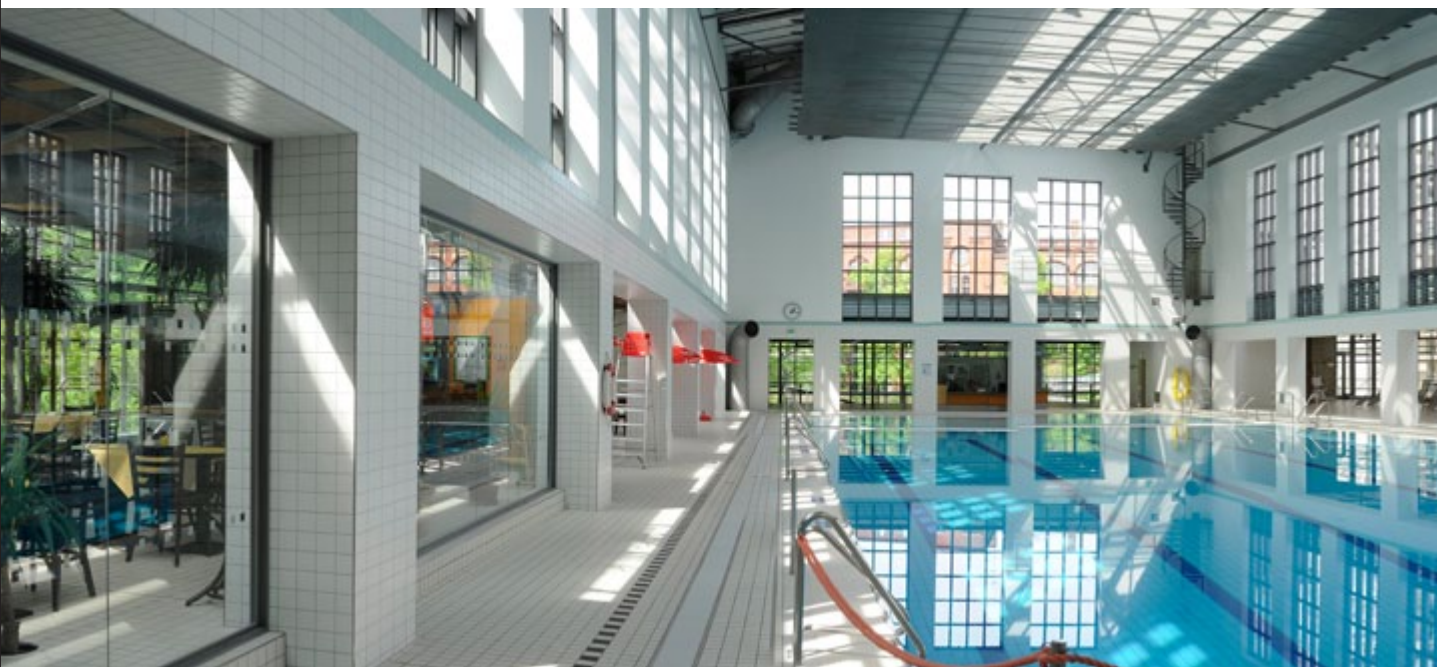

Short description

Berliner Bäder-Betriebe

As the largest operator of swimming pools in Europe with over 60 indoor pools, lidos and open-air pools, Berliner Bäder-Betriebe offer the perfect facilities for regular swimming and movement training.

In addition to the primary offer - swimming, the sauna facilities and the courses on offer in many pools help you to design your very own health and fitness program. No matter what age, size or level of fitness you are at, there is something for everyone.

The very youngest can also learn to swim with us and have fun in the water - either together with their parents in the baby swimming course or in a playful manner in a group. Our qualified course instructors teach the children how much fun it is to be in the water through clever and imaginative games.
