

wedi Top Line: even more freedom of design for bathrooms

www.wedi.net/wedi/pressemitteilungen/top-line-design

There is an increased demand on modern bathroom design – in particular, for such solutions that are holistically thought-out and easy to fit. To cope with this demand, wedi will launch more options for its ready-to-install Top design surfaces in the coming year.

wedi Top Line: even more freedom of design for bathrooms

There are already eight colours available in different textures. These include three recently launched designs with modern mineral-material composition and integrated flakes made from 100% recycled material.

The large-format seamless design surfaces of the wedi Top Line are precisely matched to wedi XPS elements. They are preformed to fit corresponding wedi Fundo shower elements and wedi functional design elements. Large-format wedi Top Wall panels can be used for cladding walls and other surfaces in the bathroom. Thanks to their thickness of only 6mm they are not only easy to cut, but also lightweight allowing for a straightforward and easy installation.
