Wall design: high-quality, hygienic and low-maintenance

### Design surfaces in Pure white

**The wedi Top Line quickly took over the market as a preferred alternative to traditional tiling in bathroom areas. To answer market demand, the Emsdetten based system provider is rounding out its portfolio further – for aesthetic wall design in shower areas, Top Wall elements are now also available in Pure white in addition to the four existing colours. The white surface, in contrast to the Stone grey, Carbon black, Sahara beige and Concrete grey in a natural stone look, is completely homogeneous thus not only ideal to match modern sanitary ware but promotes hygiene and is particularly easy to maintain.**

Thanks to their seamless nature, design surfaces from the wedi Top Line give bathrooms a refined look in contrast to large format tiling where many joint lines break the design. Up till now, the white option was only available for pre-formed Top elements such as matching design surfaces for flush-to-floor showers, niches, benches or wall-hung toilet cladding from wedi. With the addition of this colour option for Top Wall elements, striking accents in Pure white can now also be realised on walls and other vertical surfaces.

#### **Hygienic and low-maintenance**

The seamless nature of large format Top Wall elements not only makes them an optical highlight but also particularly low-maintenance. Thanks to the composition of the high-quality material, these surfaces are antibacterial and mould-resistant offering added value in bathroom areas. What is more, they are also resistant to cleaning agents and because the material itself is coloured all the way through, they are exceptionally easy to maintain. As a perfect complement to wedi construction elements, thanks to its low heat-conductivity the wedi Top Line keeps condensation at bay on bathroom surfaces and thus tops wedi's 100% waterproof system promoting hygiene around the bathroom.

## **wedi Top Wall – installation in a blink of an eye**

Designing a shower area is effortless with wedi's panel-type design surfaces. Top Wall elements can be applied to a wide range of substrates with the sole aid of wedi 610 adhesive sealant. Uneven surfaces on the wall, which often occur during renovations, can easily be levelled with a wedi building board before the Top Wall is installed. The elements can be cut to size on the construction site using standard tools and can thus be easily tailored to suit. Since the material is particularly light despite being robust, whether it be a 2.25 or 3 m<sup>2</sup> version, Top Wall elements can be carried by one person alone.

## **About wedi**

wedi GmbH, based in Emsdetten, is a leading manufacturer of and systems provider for directly tileable, watertight construction elements in Europe and North America. The extensive portfolio is complemented by high-quality design surfaces which provide additional design options in the bathroom. With its innovative system solutions and guaranteed system reliability, wedi offers long-lasting complete solutions for wet rooms. The family company, founded in 1983 by Helmut Wedi, currently employs around 500 members of staff and is active in more than 50 countries.
