**The right room temperature ensures a pleasant feel-good atmosphere in the bathroom. However, especially in small bathrooms, radiators often take up important space or do not aesthetically fit into the room. wedi offers an intelligent solution for such scenarios.**

The wedi PreLine building board serves as a support element with factory integrated grooves that allow for a quick and waterproof implementation of hot-water underfloor heating systems. The strong insulation properties of the material itself prevent heat escaping to the ground, ensuring rapid heating of the floor surface and therefore a balanced heat distribution across the entire bathroom. Thanks to the optimal heat distribution, a pleasant feeling of well-being fills the bathroom within a very short time. Installation is dust-free and fast: the hot water pipes are installed quickly and safely in the prefabricated grooves of the wedi support element. After installation, the element can be directly covered with the desired upper surface and hence it disappears into the floor. Whether tiles, slabs or natural stone covering, by choosing the surface material, the design can be matched to the style of the bathroom owner. A minimum tile size of 100 x 100 mm required.

## About wedi

The wedi Group, based in Emsdetten, is a leading manufacturer of innovative system solutions to customise the design of bathrooms and wet rooms during renovation or new building work. With the invention of the building board, Helmut Wedi, laid the foundations for the company success story in 1983. The globally active system provider with production sites in Germany and the USA, employs more than 500 people across the group and is represented in over 50 countries. The sector innovator is currently in its second generation, run by Stephan Wedi and Fabian Rechlin. The system provider specialist regularly brings new products and clever innovations onto the market which are perfectly coordinated and can be of use as individual pieces, or combined simply, quickly and safely into a complete system which is 100 percent watertight. The range covers complete construction systems, sophisticated floor-level shower systems, exciting design elements and aesthetic design surfaces, as well as practical system accessories and innovative, customer-specific customised modular constructions – with a high degree of prefabrication and integrated technology.
