

wedi Fundo Shower Systems - individual, versatile and safe

## New perspectives in bathroom design

**The demand for modern shower spaces is becoming more and more diverse. Each bathroom requires individual solutions that not only optimally match the spatial conditions but also the personal taste of the customer. wedi Fundo Shower Systems provide a universal answer to all questions relating to shower space design. Shower areas can be easily customised with the practical wedi Shower Configurator. Over 2,000 variations open up numerous perspectives for a versatile design.**

Floor level, versatile, easy to install and 100% waterproof throughout the system: thanks to numerous design variants and to their enormous flexibility, wedi Fundo shower elements are ideal for designing individual shower enclosures. The key benefit: floor-level showers are accessible and are safe to use by all generations. Whether for new construction or renovation, spacious or narrow bathroom layout, as a standard or a bespoke, custom-made solution – wedi Fundo Shower Systems offer a suitable option for any requirement and taste.

### **Tailored system security**

Functionality and safety play a decisive role during bathroom planning, especially when a floor-level shower is required. Fundo shower elements provide installers with a high-quality, 100 percent waterproof system that comes with the manufacturer's 10-year quality guarantee. As the gradient is already prefabricated during manufacturing, it does not have to be created by the installer, hence labour and installation time is significantly reduced. Short drying times and integrated drainage technology can make installation even quicker and easier. If required, Fundo shower elements with extruded polystyrene hard foam core can be flexibly adjusted on site without loss of warranty. Safe, comfortable and permanently waterproof shower areas can therefore be created in no time at all – even for extraordinary floor plans.

### **Unlimited freedom in design**

Not only functional, but also aesthetic: with over 2,000 variations, wedi Fundo Shower Systems offer the ideal solution for a wide range of requirements - practically for any installation height and shower situation. There are square and rectangular shapes, with point or linear drainage as well as a discretely hidden

optical wall drain. Extraordinary requests, such as unusual shower elements in a shell or round shape for example, can also be easily accommodated thanks to various Fundo designer shower elements. Top surfaces further expand design possibilities: Fundo shower elements can be finished either with tiles, natural stone or with matching Fundo Top surfaces from wedi. These large-format, groutless design surfaces offer a high level of slip-resistance and represent a particularly hygienic and modern alternative to the classic tiled look. The wedi Shower Configurator gives individual recommendations for the respective starting situation and guides the user step by step through different options – making the design of tailor-made and aesthetically pleasing shower enclosures a breeze.

## **About wedi**

The wedi Group, based in Emsdetten, is a leading manufacturer of innovative system solutions to customise the design of bathrooms and wet rooms during renovation or new building work. With the invention of the building board, Helmut Wedi, laid the foundations for the company success story in 1983. The globally active system provider with production sites in Germany and the USA, employs more than 500 people across the group and is represented in over 50 countries. The sector innovator is currently in its second generation, run by Stephan Wedi and Fabian Rechlin. The system provider specialist regularly brings new products and clever innovations onto the market which are perfectly coordinated and can be of use as individual pieces or combined simply, quickly and safely into a complete system which is 100 percent watertight. The range covers complete construction systems, sophisticated floor-level shower systems, exciting design elements and aesthetic design surfaces, as well as practical system accessories and innovative customer-specific customised modular constructions – with a high degree of prefabrication and integrated technology.
