wedi Sanoasa Shine loungers for wet areas

## Wellness loungers with luxurious design coating

**The highest comfort with maximum individuality – that's what the new wedi Sanoasa Shine wellness loungers from Emsdetten-based wedi offer. Thanks to exceptional design language and a customisable colour coating, the new range leaves nothing to be desired when it comes to design for spa & wellness. Once built, they can be used immediately with no additional installation effort and, as light-weight items, can be moved into the desired position with no problem.**

### **Elegant lacquer coating in a multi-layer process**

The substructure of wedi Sanoasa Shine loungers is made from extruded rigid polystyrene foam board and finished using innovative multi-layer lacquering to produce a stunning piece of designer furniture. The surface finish is seamless, smooth and glossy, making these loungers a highlight of any area. In the first step, a pressure-resistant special coating applied that provides extremely high resistance. The subsequent lacquers are high-quality and durable and available in around 200 colours (RAL), with the option of choosing between classic UNI colours and striking mother-of-pearl colours. The mother-of-pearl coating is achieved with a triple-layer system – a UNI base colour, a mother-of-pearl effect lacquer and a colourless clear lacquer which, in addition to added shine and glitter effects, also provides increased protection allowing surface scratches to be quickly removed by polishing.

### **Perfect in colour and function**

These exotic wellness loungers are available in five comfortable shapes all of which are suitable for a wide variety of applications. Delivered ready-to-use, they can be put to use immediately with no installation effort. They are practical too, thanks to the seamless surface, loungers in the wedi Sanoasa Shine range are easy to clean with very little maintenance required. Perfect for sophisticated private bathrooms as well as for large spa & wellness facilities.

## About wedi

The wedi Group, with its headquarters in Emsdetten, is a leading manufacturer and systems provider for tileable, waterproof shower and construction systems in Europe and North America. The extensive product portfolio is rounded out with creative design elements and high-quality surfaces for flush-to-floor showers and wall applications. With its innovative system solutions and guaranteed system reliability, wedi offers long-lasting complete solutions for the planning and design of wet rooms. The family company, founded in 1983 by Helmut Wedi, today employs more than 500 members of staff across the group and is active in more than 50 countries.
