High-quality, stylish and easy to install

New: surfaces for functional design elements expand wedi Top Line

wedi Top Line convinces: after the positive response to the introduction of the wedi design surfaces for walls and floors at the beginning of 2019, the wedi Top Line has been expanded to cover other bathroom areas in 2020. Niches, wall-hung toilet cistern and bathroom furniture can now also be clad with seamless surfaces from the Emsdetten-based system provider. In addition to previously available colours of Pure white, Stone grey and Carbon black, more individual accents can be created and varied colour combinations can be realised with newly added Sahara beige and Concrete grey colours.

The functional composite material meets the highest hygiene and design requirements. On one hand, the scratch-resistant, durable surface is antibacterial and mould-resistant, and can easily be cleaned. On the other hand, the high-quality composite material provides a refined natural stone look which – just like in nature – is entirely individual thanks to its mineral components. Each surface thus has its own unique character and is a unique piece. Only Pure white has a homogeneous texture and allows the white to shine even more brightly.

Custom-fit cladding for niches

Niches are a major enhancement in every bathroom. Everything you need for showering can be temporarily stored here without taking up space in the room. The high-quality, seamless wedi Sanwell Top niche design solution convinces with excellent ease of installation: it is delivered ready-to-install and is glued in with wedi 610 adhesive sealant, with no drilling and screwing.

wedi I-Board Top: less time, more design freedom

Seamless surfaces have particular value, in addition to the aesthetic aspect, in areas with high hygiene requirements. That's why wedi has expanded its surface product line to include the I-board, wedi's solution for wall-hung toilet cistern

cladding. The wedi I-Board Top design surface can be applied quickly and easily with custom-fit, prefabricated openings and with the help of wedi 610 adhesive sealant and thus forms a firm, waterproof connection to the substructure.

Seamless bathroom furniture in wet areas

With cladding for the Sanoasa 3 bench, wedi Top Line goes beyond design in the floor and wall area. With wedi Sanoasa Top, wedi has designed a surface for the elegant, rounded bench which further increases the seating comfort of the bathroom furniture with its elegant look and comfortable feel. The one-piece, 6 mm thick element always feels the right temperature. Like the wedi I-Board Top, it can be subtly integrated into the bathroom design or staged as a highlight with one of the five stylish colours available.

Fundo Top elements – beautifully matched

The central elements of the wedi Top Line are the wedi Top Wall for wall and surface cladding and the Fundo Top for flush-to-floor showers, which are already established on the market. Together with the wedi Fundo Primo, Plano and Riolito neo shower elements, the Fundo Top design surfaces, which are non-slip and pleasantly warm underfoot, create a perfectly matched and technically sophisticated system. wedi Top Wall for wall and surface design can be applied with versatility to a wide range of substrates and can even smooth out unevenness in the wall, in renovations for example. Thanks to the large-format solutions, an exclusive overall result is quickly created. The result is an aesthetic shower area in which no grout lines break the design.

About wedi

wedi GmbH, based in Emsdetten, is a leading manufacturer of and systems provider for directly tileable, watertight construction elements in Europe and North America. The extensive portfolio is complemented by high-quality design surfaces which provide additional design options in the bathroom. With its innovative system solutions and guaranteed system reliability, wedi offers long-lasting complete solutions for wet rooms. The family company, founded in 1983 by Helmut Wedi, today employs around 400 members of staff and is active in more than 30 countries.
